

MATERIAL SAFETY DATA SHEET

Lithium-ion Polymer Battery

Model:KPL802030-420mah

Page 1 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. Shenzhen KAYO Battery Co., Ltd. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it ---- File No./Rev.: KAYO-MSDS-1220

Material Safety Data Sheet

Section 1-Chemical Product and Company Identification

Product Identification

KAYO Lithium-Ion Polymer battery

Norminal Voltage	:	3.7V	
Equivalent Lithium content	:	$\leq 20 \text{Wh}$	
Testing Period	:	JAN.9,2018	To JAN.11,2018

Manufacturer

SHENZHEN KAYO BATTERY CO., LTD

11# Building, Hualian Industrial Park, Huaning Road, Dalang Community, Longhua town, Shenzhen, ChinaPostcode : 518109

Telephone	:	+86-755-28117967/33239078
-----------	---	---------------------------

Fax : +86-755-28117957

Section 2-composition/information on ingredients					
Chemical Composition	Molecular Formula	Weight%	CAS No	OSHA(PEL)	ACGIH(TLV)
Cobalt oxide	Cobalt oxide	25~30%	1307-96-6	N/A	N/A
Graphite powder	С	23~25%	7782-42-5	N/A	N/A
	LiPF6 C3H4O3 C4H6O3				
Electrolyte	C3H10O	12~15%	21324-40-3	N/A	N/A
	3				
Polyethylene	(C ₂ H ₄) n	0.5~1%	9002-88-4	N/A	N/A
Cu	Cu	5~10%	7440-50-8	N/A	N/A
Nickel	Nickel	2~3%	7440-02-0	N/A	N/A
Polyvinylidene fluoride	(CH ₂ CF ₂) n	0.5~2%	24937-79-9	N/A	N/A
Polypropylene	(C3H6) n	2~5%	9003-07-0	N/A	N/A
Aluminum foil	Al	7~10%	7429-90-5	N/A	N/A
Silicon	Si	1~2%	7440-21-3	N/A	N/A
Epoxy Resin	EP	1.5~2%	38891-59-7	N/A	N/A
PVC	(C ₂ H ₃ Cl)x	0.2~0.5%	9002-86-2	N/A	N/A
Gold	Au	0.2~0.5%	7440-57-5	N/A	N/A
Sn	Sn	$0.05 \sim 0.1\%$	7440-31-5	N/A	N/A

Section 2-Composition/Information on Ingredients

Page 2 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. Shenzhen KAYO Battery Co., Ltd. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it ---- File No./Rev.: KAYO-MSDS-1220

	Section 3-Hazards Identification
Preparation hazards and classification	Not dangerous with normal use. Do not dismantle, open or shred Li-ion Battery.Exposure to the ingredients contained within or their ingredients products could be harmful.
Appearance, Color, and Odor	Solid object with no odor, no color.
Primary Route(s) of Exposure	These chemicals are contained in a sealed stainless steel enclosure. Risk of exposure occurs only if the cell is mechanically, thermally or electrically abused to the point of compromising the enclosure. If this occurs, exposure to the electrolyte solution contained within can occur by Inhalation, Ingestion, Eye contact and Skin contact.
Potential Health Effects:	ACUTE (short term): see Section 8 for exposure controls In the event that this battery has been ruptured, the electrolyte solution contained within the battery would be corrosive and can cause burns. Inhalation: Inhalation of materials from a sealed battery is not an expected route of exposure. Vapors or mists from a ruptured battery may cause respiratory irritation. Ingestion: Swallowing of materials from a sealed battery is not an expected route of exposure. Swallowing the contents of an open battery can cause serious chemical burns of mouth, esophagus, and gastrointestinal tract. Skin: Contact between the battery and skin will not cause any harm. Skin contact with contents of an open battery can cause severe irritation or burns to the skin. Eye: Contact between the battery and the eye will not cause any harm. Eye contact with contents of an open battery can cause severe irritation or burns to the eye. CHRONIC (long term): see Section 11 for additional toxicological data
Medical Conditions Aggravated by Exposure	Not applicable
Reported as carcinogen	Not applicable

Section 4-First-aid Measures		
Inhalation	If contents of an opened battery are inhaled, remove source of contamination or move victim to fresh air. Obtain medical advice.	

Page 3 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. Shenzhen KAYO Battery Co., Ltd. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it --- File No./Rev.: KAYO-MSDS-1220

KAYO 深圳市嘉洋電池有限公司 SHENZHEN KAYO BATTERY COMPANY LIMITED

Skin contact	If skin contact with contents of an open battery occurs, as quickly as possible remove
	contaminated clothing, shoes and leather goods. Immediately flush with lukewarm, gently
	flowing water for at least 30 minutes. If irritation or pain persists, seek medical attention.
	Completely decontaminate clothing, shoes and leather goods before reuse or discard.
Eye contact	If eye contact with contents of an open battery occurs, immediately flush the contaminated
	eye(s) with lukewarm, gently flowing water for at least 30 minutes while holding the eyelids
	open. Neutral saline solution may be used as soon as it is available. If necessary, continue
	flushing during transport to emergency care facility. Take care not to rinse contaminated
	water into the unaffected eye or onto face. Quickly transport victim to an emergency care
	facility.
Ingestion	If ingestion of contents of an open battery occurs, never give anything by mouth if victim is
	rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth
	thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink 60 to 240 mL
	(2-8 oz.) of water. If vomiting occurs naturally, have victim lean forward to reduce risk of
	aspiration. Have victim rinse mouth with water again. Quickly transport victim to an
	emergency care facility.

	Section 5-Fire Fighting Measures
Flammable	In the event that this battery has been ruptured, the electrolyte solution contain within the
Properties	battery would be flammable. Like any sealed container, battery cells may rupture when
	exposed to excessive heat; this could result in the release of flammable or corrosive
	materials.
Suitable	Use extinguishing media suitable for the materials that are burning.
extinguishing	
Media	
Unsuitable	Not available
extinguishing	
Media	
Explosion	Sensitivity to Mechanical Impact: This may result in rupture in extreme cases
Data	Sensitivity to Static Discharge: Not Applicable
Specific	Fires involving Li-ion Battery can be controlled with water. When water is used, however,
Hazards	hydrogen gas may evolve. In a confined space, hydrogen gas can form an explosive mixture.
arising from	In this situation, smothering agents are recommended to extinguish the fire
the chemical	
Protective	As for any fire, evacuate the area and fight the fire from a safe distance. Wear a
Equipment	pressure-demand, self-contained breathing apparatus and full protective gear.
and	Fight fire from a protected location or a safe distance. Use NIOSH/MSHA approved
precautions	full-face self-contained breathing apparatus(SCBA) with full protective gear.
for firefighters

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. Shenzhen KAYO Battery Co., Ltd. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it --- File No./Rev.: KAYO-MSDS-1220

NFPA

Health: 0 Flammability: 0 Instability: 0

Section 6-Accidental Release Measures		
Personal Precautions, protective equipment, and emergency procedures	Restrict access to area until completion of clean-up. Do not touch the spilled material. Wear adequate personal protective equipment as indicated in Section 8.	
Environmental Precautions	Prevent material from contaminating soil and from entering sewers or waterways.	
Methods and materials for Containment	Stop the leak if safe to do so. Contain the spilled liquid with dry sand or earth. Clean up spills immediately.	
Methods and materials for cleaning up	 Absorb spilled material with an inert absorbent (dry sand or earth). Scoop contaminated absorbent into an acceptable waste container. Collect all contaminated absorbent and dispose of according to directions in Section 13. Scrub the area with detergent and water; collect all contaminated wash water for proper disposal. 	

SHENZHEN KAYO BATTERY COMPANY LIMITED

Section 7-	-Handling and Storage
Handling	Don't handling Li-ion Battery with metalwork. Do not
	open, dissemble, crush or burn battery.
	Ensure good ventilation/ exhaustion at the workplace.
	Prevent formation of dust. Information about
	protection against explosions and fires: Keep ignition
	sources away- Do not smoke.
Storage	If the Li-ion Battery are subject to storage for such a
	long term as more than 3 months, it is recommended
	to recharge the Li-ion Battery periodically.
	3 months: -10 $^{\circ}$ C ~+40 $^{\circ}$ C , 45 to 85%RH And
	recommended at $0^{\circ}C \rightarrow 35^{\circ}C$ for long period storage.
	The capacity recovery rate in the delivery state (30%)
	capacity of fully charged) after storage is assumed to

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. Shenzhen KAYO Battery Co., Ltd. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities --- File No./Rev.: KAYO-MSDS-1220 from reliance on it

KAYO 深圳市嘉洋電池有限公司 SHENZHEN KAYO BATTERY COMPANY LIMITED

be 80% or more.
Do not storage Li-ion Battery haphazardly in a box or
drawer where they may short-circuit each other or be
short-circuited by other metal objects.
Keep out of reach of children.
Do not expose Li-ion Battery to heat or fire.
Avoid storage in direct sunlight.
Do not store together with oxidizing and acidic
materials.

Section 8-Exposure Controls/Personal Protection

Engineering Controls	Use local exhaust ventilation or other engineering
	controls to control sources of dust, mist, fumes and
	vapor. Keep away from heat and open flame. Store in
	a cool, dry place.
Personal Protective Equipment	Respiratory Protection: Not necessary under
	normal conditions.
	Skin and body Protection: Not necessary under
	normal conditions, Wear neoprene or nitrile rubber
	gloves if handling an open or leaking battery.
	Hand protection: Wear neoprene or natural rubber
	material gloves if handling an open or leaking
	battery.
	Eye Protection: Not necessary under normal
	conditions, Wear safety glasses if handling an open or
	leaking battery.
Other Protective Equipment	Have a safety shower and eye wash fountain readily
	available in the immediate work area.
Hygiene Measures	Do not eat, drink, or smoke in work area.
	Maintain good housekeeping.

Section 9-Physical and Chemical Properties

Page 6 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. Shenzhen KAYO Battery Co., Ltd. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities --- File No./Rev.: KAYO-MSDS-1220 from reliance on it

Physical	Form: Solid			
State	Color: White	Color: White		
	Odour: Monotony			
Change in con	ndition:			
pH, with indi	cation of the concentration	Not applicable		
Melting point	/freezing point	Not available.		
Boiling Point range:	, initial boiling point and Boiling	Not available.		
Flash Point		Not available.		
Upper/lower	flammability or explosive limits	Not available.		
Vapor Pressure:		Not applicable		
Vapor Density: (Air = 1)		Not applicable		
Density/relative desity		Not available.		
Solubility in Water:		Insoluble		
n-octanol/water partition coefficient		Not available.		
Auto-ignition temperature		130°C		
Decomposition temperature		Not available.		
Odout threshold		Not available.		
Evaporation rate		Not available.		
Flammability	(soil, gas)	Not available.		
Viscosity		Not applicable		

Section 10- Stability and Reactivity

Stability	The product is stable under normal conditions.
Conditions to Avoid (e.g. static discharge, shock or	Do not subject Li-ion Battery to mechanical shock.
vibration)	Vibration encoutered during transportation does not
	cause leakage, fire or explosion.
	Do not disassemble, crush, short or install with

Other Adverse Effects

Not Available

Section 13-Disposal Considerations

Product disposal recommendation: Observe local, state and federal laws and regulations. Packaging disposal recommendation: Be aware discarded batteries may cause fire, tape the battery terminals to insulate them. Don't disassembly the battery. Completely discharge containers (no tear drops, no powder rest, scraped carefully). Containers may be recycled or re-used. Observe local, state and federal laws and regulations.

The potential effects on the environment and human health of the substances used in batteries and accumulations; the desirability of not disposing of waste batteries and accumulators as unsorted municipal waste and of participating in their separate collection so as to facilitate treatment and recycling.

Section 14-Transport Information

This report applies to by sea, by air and by land;

The Li-ion Battery tested according to the requirements of the 5th revised edition of the UN manual of tests and Criteria, Part III, subsection 38.3;

Lithium ion battery was protected so as to prevent short circuits. This includes protection against contact with conductive materials within the same packaging that could lead to short circuit;

The LITHIUM ION BATTERY according to Section II/IA/IB of PACKING INSTRUCTION 965/966/967 of the 2018 IATA Dangerous Goods regulations 59th Edition may be transported and applicable U.S.DOT regulations for the safe transport of Li-ion Battery.

More information concerning shipping, testing, marking and packaging can be obtained from label master at http://www.labelmaster.com/.

The packaging shall be adequate to avoid mechanical damage during transport, handling and stacking. The materials and pack design shall be chosen so as to prevent the development of unintentional electrical conduction, corrosion of the terminals and ingress of moisture.

The package must be handled with care and that a flammability hazard exists if the package is damaged; Each package must be labeled with a Li-ion Battery handling label or in addition to the Class 9 hazard label. With regard to transport, the following regulations are cited and considered:

The International Civil Aviation Organization (ICAO) Technical Instructions.

The International Air transport Association (IATA) Dangerous Goods Regulations. UN number of lithium battery: UN3480 or UN3481;

UN Proper shipping name/Description (technical name): Lithium ion batteries or Lithium ion batteries contained in equipment or Lithium ion batteries packed with equipment;

UN Classification (Transport hazard class): Non dangerous;

Marine pollutant (Y/N): N;

The International Maritime Dangerous Goods (IMDG) Code.

For lithium-ion batteries by sea, provided that packaging is strong and prevent the products from short-circuit. UN
